

January 28, 2026: Letter to Senator John Cornyn

Senator John Cornyn,

I am writing your office again to inform you that Donald Trump's team of spies is continuing to abuse our home with an ongoing private nuisance in retaliation for us no longer supporting his criminal efforts to exert threats across the world.

One day, I will count up the number of letters that I have sent out to my political representatives, but for now, I live in the moment and continue writing to alert those that have the power to hold him accountable of the ongoing terrorism that is being orchestrated by the 'hidden' hand of Donald Trump's political campaign arm.

We are being relentlessly spied on by a team of people that are then sending information about our internal home life to another team of criminals that is receiving that information on the ground around our home. The second team - around our house - is then being cued to cause acoustic agitations, a persistently intrusive presence, and a generally threatening container over and around the course of our lives as we are made (forced) to acknowledge that we are being spied upon day and night by our government's darkened, hidden, criminal arm.

In fact, as I write this email to you now, a car horn is honking outside to alert me to their presence. Let me go look. Yes, that was our 'construction worker' neighbors across the street honking for some unknown reason to continue their 'noisy' charade around our home.

The team on the ground appears to be illegal or foreign workers, and they often appear to be construction workers, and they also appear to be yard workers and other laborers that would be employed by construction workers, builders, housing complex owners, and other 'Republican-type' business owners.

I am specifically alerting your office that the Republican Party is using employees of their businesses to annoy, bother, and agitate the lives of their political targets - in those targets' homes, and everywhere that those targets go to in their lives - all the way to Spain! Yes, this operation did follow us all the way into a foreign country and operated in the exact same way there as it did right here in San Antonio, Texas.

I am alerting you very clearly: the worldwide Freemason network has shown itself to me and has made it very clear that they are receiving information from a spying team inside of military units in both the United States and Spain and that they are then controlling a group of criminals and gang members on the ground to carry out unlawful efforts that are seemingly 'disconnected' from their true source - military and government criminals.

As I have been making known to the public for some time now, it has been made clear to me that the government and law enforcement is no longer 'taking down' criminal operations. Instead, a dark element of the government and law enforcement community is, instead, 'taking over' these criminal operations for their own nefarious purposes.

We see this being carried out in Venezuela in a very public way right now. Donald Trump and his military swooped in, took the leadership of the criminal regime, and replaced themselves as the head of that criminal regime to lead the same group of criminals into the same types of behavior for the benefit of a new boss - American military and government.

I am alerting your office of very serious criminal behaviors that are manifesting around our house and around the world and I am alerting your office that those criminal behaviors are being sponsored by the American government, the American military, and the American national security apparatus.

Please forward this information to everyone in your circle of influence so that we can all work to expose and clean up the mess that is being made from a group of saboteurs that are abuse their trusted positions within our government surveillance state to cause harm to innocent people around the world.

Thank you for your attention to this extremely urgent and important matter.

Kindest regards,

Chris Noel Carlin,
FORMER Republican Party
Precinct Committee Chair,
Precinct #2053,
Bexar County, Texas

(I will never support the Republican Party again after this experience.)
